

DEON MARTIN

Salesforce Administrator | Platform Solutions, Automation & Security

Somerset, NJ | deonmartinxxxvii@gmail.com | [CareConnect Portfolio](#) | [Trailblazer Profile](#) | [LinkedIn](#)

Professional Summary

Hands-on Salesforce Administrator with a healthcare operations background and experience designing, building, and testing CareConnect, an independently developed healthcare operations platform on Salesforce. I bring 4+ years of experience in healthcare, pharmaceuticals, and regulated operations, and a passion for improving operational efficiency through user-focused technology solutions. My experience includes Salesforce automation, security, reporting, Lightning Web Components, and platform configuration. Currently preparing for the Salesforce Certified Administrator exam.

Technical & Operational Skills

- **Business Process Design**
Discovery, requirements analysis, process mapping, root-cause analysis, workflow design, and process improvement
- **Salesforce Solution Building**
End-to-end platform design using custom objects and relationships, record-triggered Flows, Lightning App Builder, reports, and dashboards
- **Platform Security & Controls**
Permission sets, sharing rules, object- and field-level security, least-privilege access, and audit-ready configurations
- **Tools, Testing & Delivery**
Salesforce CLI, metadata deployment, UAT, troubleshooting, migration testing, and technical documentation
- **Regulated Operations**
GMP/SOP compliance, inventory and barcode workflows, traceability, quality documentation, and audit readiness

Salesforce Project Experience

CareConnect - Independent Salesforce Project | 2025 - Present

- Designed the CareConnect data model for patient encounters, transportation, readiness, department work, incidents, and operational reporting.
- Built live-location and census controls that keep one current location per active encounter, prevent duplicate counts, and preserve movement history.
- Secured the platform for six user groups using 10 permission sets, sharing controls, object and field security, and facility-based access.
- Created a mobile transportation workflow covering assignment, pickup, arrival, nursing handoff, alerts, and 24-hour history.
- Completed four Salesforce migration waves and tested access, workflows, desktop behavior, and mobile behavior across multiple user roles.
- Currently expanding the Command Center, Nursing Shift Handoff, and permission-aware Agentforce workflows.

**Healthcare,
Laboratory &
Regulated
Operations**

Lab Technician
DSM-Firmenich (Contract), Plainsboro Township, NJ
Apr 2022 - Oct 2023

- Coordinated with perfumers and production partners to prioritize formulas according to urgency, specifications, and manufacturing timelines.
- Prepared ingredient dilutions and formulations accurately while following controlled laboratory procedures and quality requirements.
- Completed GMP-compliant batch records, sample labels, production documentation, and inventory records to support traceability and audit readiness.

IV Compounding Pharmacy Technician
Robert Wood Johnson University Hospital - Home Infusion Care
New Brunswick, NJ Mar 2020 - Sep 2020

- Prepared total parenteral nutrition, IV infusions, antibiotic piggybacks, and syringes using aseptic technique and controlled departmental procedures.
- Managed time-sensitive IV inventory by ordering, receiving, stocking, and tracking essential supplies for patient-support operations.
- Maintained accurate cleaning, equipment-maintenance, and sterility-testing logs in accordance with organizational policy and regulatory standards.

IV Compounding Pharmacy Technician
PharMEDium AmerisourceBergen, Dayton, NJ Feb 2017 - Mar 2019

- Performed sterile compounding in an ISO 5 laminar airflow hood under pharmacist supervision using standardized aseptic processes.
- Verified IV batch accuracy against electronic work orders using handheld barcode-scanning technology and documented batch completion.
- Operated, inspected, and calibrated digital scales, Baxter repeater pumps, and related equipment to support precise production.
- Completed area clearance, media-fill testing, gloved fingertip sampling, and controlled documentation required to maintain cleanroom qualification.
